## EDUCATION

### Institute of Space Technology, Islamabad (IST)

Bachelor of Science in Computer Science

Islamabad, Pakistan

2020–2024

– Front-End Web Developer

Front-End Web Developer and founder of i2build, with a Computer Science foundation and a data-analytics background. Builds fast, responsive, accessible and search-optimised web applications with React, Tailwind CSS and modern front-end practices: component architecture, state management, REST API integration, authentication and deployment. Leads the design and development of websites, e-commerce platforms and web applications, with a business-first approach so that every interface is clear, secure and measurable.

## EXPERIENCE

### i2build — Founder & Lead Developer

Dec 2025 – Present

Web design and development studio for businesses in the UK, US and Switzerland | [i2build.com](https://i2build.com)

- **Pre-launch (Dec 2025 – Sep 2026):** built the technical and business foundation of the studio through hands-on projects, including the RE:STORE e-commerce platform and an AI code-conversion tool, alongside business-analysis and data case studies that shaped how i2build plans, builds and measures its work.
- **Launch (Oct 2026):** launched i2build.com as a multi-page, search-optimised site with service pages, UK, US and Swiss market pages and case studies, engineered for speed, accessibility and security (structured data, strict Content-Security-Policy, hardened forms with spam and rate protection).
- **Concept projects:** designed and built five concept projects to demonstrate range and craft: a luxury watch store with a 3D configurator, a real-estate platform with a mortgage calculator, a scroll-driven home tour, a coffee brand with 3D scroll animation and a cinematic architecture site, using React, Three.js and Framer Motion.
- **SiteScope:** built a full-stack, AI-assisted website audit tool (React, Node.js/Express, PostgreSQL) and apply the same SEO, performance and accessibility standards to every build.
- **Ownership:** responsible for the full delivery cycle, from requirements, UX/UI and development to deployment, SEO set-up and maintenance, with a long-term vision of growing i2build into a complete AI platform of agents and automation.

### Enigma Software Solutions

Islamabad, Pakistan

Front-End Web Developer

Jul 2026 – Oct 2026

- Developed scalable, responsive user interfaces with React.js, reusable components, Tailwind CSS and semantic HTML.
- Implemented React Hooks, Context API, React Router, state management and REST API integration to build dynamic, maintainable web applications.
- Translated designs and requirements into functional, responsive React features, working alongside experienced developers on professional web projects.
- Delivered RE:STORE, a full e-commerce application with an admin dashboard, as the capstone project of the role.

## ACADEMIC EXPERIENCE

### Final Year Project | IST Islamabad

Islamabad, Pakistan

Skin Disease Detection Web Application (Nominated for gold medal)

Leading Group Member

Sep 2023 – Jul 2024

[github.com/HassamKhan0826/Skin-Disease-Detection](https://github.com/HassamKhan0826/Skin-Disease-Detection)

- Led a team to build a skin disease detection web application around a machine-learning model trained on medical image datasets.
- Personally developed the AI component: data preprocessing, model training and evaluation to improve prediction accuracy and system performance.
- Identified classification patterns and delivered data-driven detection outcomes through analytical techniques.

## PROJECTS

### RE:STORE — E-Commerce & Admin Management System | React | Vite | React Router | Tailwind CSS

Live demo: [react-ht-store.vercel.app](https://react-ht-store.vercel.app)

[github.com/HassamKhan0826/React-E-Commerce-Admin-Management-System](https://github.com/HassamKhan0826/React-E-Commerce-Admin-Management-System)

- Built a complete e-commerce web application with React and Vite: product browsing, search and filtering across 190+ products, a per-customer shopping cart, and a full checkout with order tracking.
- Developed a protected admin dashboard to manage products, orders, users and messages, with authentication (SHA-256 hashed passwords), protected and nested routing, and global state using Context API and useReducer.
- Implemented localStorage persistence, custom hooks, and a fully responsive dark/light UI.

- Built a React app that converts code between programming languages using an AI model and REST API integration, with a clean, responsive interface.

SKILLS

---

- **Core Expertise:** HTML5 • CSS3 • JavaScript (ES6+) • React • Tailwind CSS • Responsive & Mobile-First Design • Accessibility (WCAG) • Cross-Browser Compatibility
- **React Architecture:** Advanced & Custom Hooks • Context API & useReducer • Component Patterns • State Management • React Router (nested, dynamic & protected routes) • Performance Optimization
- **Web Platform & Quality:** REST API Integration • Authentication & Protected Routes • Core Web Vitals • Technical SEO & Structured Data • Security Headers (CSP) • Framer Motion • Three.js (WebGL)
- **Full-Stack & Tooling:** Node.js & Express • PostgreSQL • PHP (secure form handling) • Vite • Git & GitHub • npm • ESLint • VS Code • Deployment (Hostinger, Vercel)
- **Business & Delivery:** Business Analysis • Requirements Gathering • Stakeholder Communication • Data Analytics (SQL, Python, Power BI) • Project Ownership
